

## DIRECTOR'S REPORT: SUMMER 1996

FALL finds the library with several unfinished projects, as follows:

I. I did not complete the Materials Selection and Use Policy.

II. The computer project has undergone some changes which cost us time. We found that the staff computers purchased a couple years ago were now basically obsolete and decided to place these, after minimal upgrades, in the public spots, and NOT the new ones, which will go to staff.

III. I still have only two estimates for the repair of the down spouts, which has grown to 4.

IV. I have not heard about any proposed corrections to our dysfunctional heating system, instead I have heard that the HVAC study company wants to see our first, failed air-conditioning specs. What happened to a new, professional view based on alteration to our existing heating system?

SUMMER did see the following:

I. The new Children's circulation desk. It's a beauty.

II. Development of the adult department's film program.

III. Record high July circulation.

IV. Re-establishment of the YA corner and updating of all college materials.

V. Problems which occurred with the roof project were identified and fixed.

VI. Public access to *Shoren*et via PC in the Reference area.

VII. Part 1 of the next State Aid application completed & mailed.
